The workshop is one hour long and includes a screening of a 7 minute long film that captures the stories of people in the community. This was filmed last year at the hospital on Dying to Know Day, August 8th 2014. The session will also include art-making activities that will empower you to utilise visual and/or written metaphors to communicate your thoughts and feelings about death, dying and bereavement. You will also be inspired to create a piece of work and share it later with people who matter to you.
